## FUNCTIONAL CAPACITY EVALUATION

Client: Sample Evaluatee

Date of birth: 1975-07-07

Date of loss: 2012-06-08

Employer name: ABC Company

Job title: Shipper

Claim Number:#: 9875-4321

### ASSESSOR QUALIFICATIONS

The Assessor graduated from Physical Therapy School in 2001. He has performed hundreds of assessments including FCEs, PDA, Physical assessments, file reviews, addendums, and in-home assessments. He has completed post-graduate certificate training in Functional Capacity Evaluation with Metriks Education. In addition to third party assessments, he continues to maintain a private practice in Ontario.

### PURPOSE OF ASSESSMENT

An FCE is a measure of a client's functional ability to perform personal and/or occupational tasks. The purpose of this assessment is to determine the evaluatee's functional abilities as they pertain to his ability to perform his pre-loss occupation. Mr. Evaluatee was referred with the diagnosis of low back and neck strain . Mr. Evaluatee was present for the evaluation on 2013-11-12.

### CONCLUSIONS

**Overall level of work:** Sedentary work. Sedentary work involves lifting no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. Although a sedentary job is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out job duties. Jobs are sedentary if walking and standing are required occasionally and other sedentary criteria are met.

**Overall level of effort:** It is my opinion that based on the client's overall observed performance, their abilities are greater than demonstrated. This opinion is supported by the objective measures and my clinical observations.

Sincerely,

Sample Assessor

Certified Metriks FCE Assessor
